

5A Plug-in Filter No.4812UK

Functions:

- ◆ Easy plug-in device;
- ◆ Filter extra interfere on the power line;
- ◆ Prevent other devices weakening your signal;
- ◆ Clean out the “noise” on the power line;
- ◆ Prevent X10 signal absorbed by other devices;

Installation:

- Plug 5A Filter in any common receptacle in your home is ok.

Technical Spec:

Rated Voltage: 230VAC±10%, 50Hz

Load Current: ≤5A

Suitable Temperature: -10~50°C

Usage:

Plug the device which brings “noise” or absorb X10 single in 5A Plug-in Filter, and then plug the Filter in any common receptacle in you home. You have done it!

Tech Tip:

A quick way to test if an electrical device is adding interference on the power line, or absorbing X10 signals is to unplug the device and re-transmit the signal. If the X10 device begins working after the appliance is unplugged, then a Filter is exactly what you need.
